JavaScript is now the language powering databases and many more applications. It's even possible to develop embedded applications, mobile apps, TV sets apps and much more. What started as a tiny language inside the browser is now the most popular language in the world.

Using advanced javascript can help in gamifying user experience. This primer to how to develop a grasp over Gaming and data visualisation.

JAN 24 Sundance Film Festival

January 24 @ 8:00 am - February 3 @ 5:00 pm

Recurring Event ([See all](#))

\$100

Sundance is North America's most famous independent film festival, appealing to the non-conformist and rebellious film directors who do not want to play by Hollywood's rules. Located in a relatively small town, first-time attendees may be surprised by the lack of glamour of where the films are shown, but there is a certain buzz about sitting in an old theater watching a mold-bursting indie film sat besides an actor about to hit superstardom. If you love edgy, powerful films, Sundance may be just what you are looking for.
